

Custom Carpet Company

Creating the bespoke,
custom made and unique

Welcome

We are as individual as you are

Over thirty years' experience in creating the bespoke, custom made and unique.

We have helped our clients to design their perfect carpets and rugs, then produced, delivered and installed them in some of the most prestigious settings throughout the world.

Add to that our specialist knowledge of yacht and aircraft installation and we will show you a range of endless possibilities.

As a family business with more than three decades' experience, we will guide and support you through everything from concept to completion.

In fact, our extensive expertise gained over this period of time means that we are the company best placed to advise you.

A Complete Service

Classic

A classic staircase runner in a combination of raised and hand carved textures made in 100% wool. Designed and installed, including supply of stair rods and eye fixings.

Unconventional

This project was developed with the client to create a striking unconventional design.

Made in 100% wool combining a cut pile ground with the design detail in loop pile.

This carpet is one of the more extreme examples of what is achievable to meet a client's brief.

We are always open to a challenge.

Extreme

Style

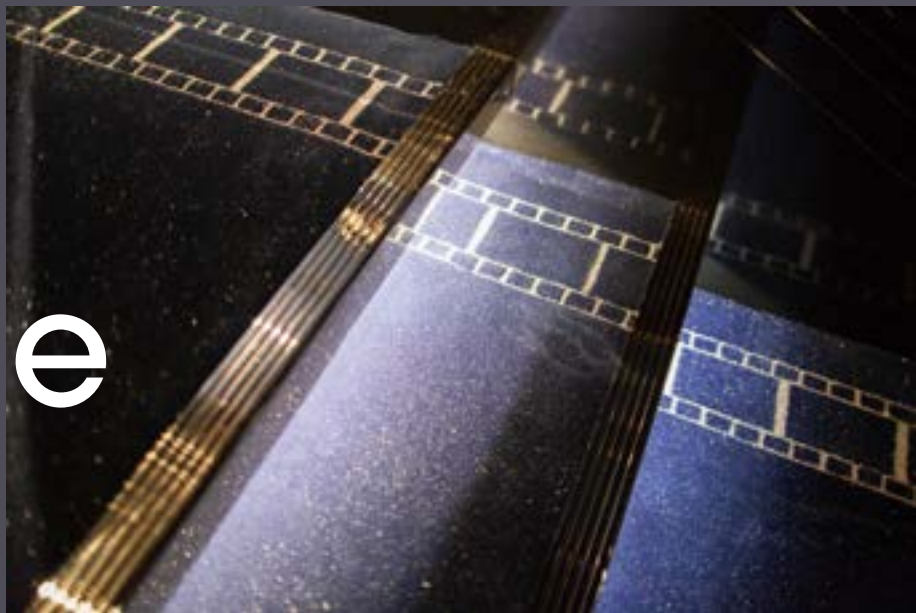

Designed to link with the client's fabric choice and colouring throughout the rest of their bedroom suite, this carpet is a combination of fine semi worsted wool for the background with design in hand carved high sheen cotton viscose.

We also have options for Silk, Linen, Bamboo and other fibres.

Sparkle

This private cinema and bar is an interesting combination of fine semi worsted wool blended with silver Lurex to sparkle.

The film strip border is created from recessed low loop pile silver Lurex.

Bespoke

Creating a three dimensional effect in the carpet linking with etched glass floral design was the brief for this project.

Made in a combination of fine semi worsted wool with cotton viscose for the flowers.

Statement

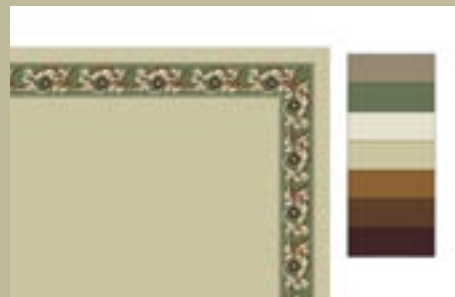

A statement piece for this hotel library was the requirement for this project. The carpet is made in high density 100% wool with loop pile shaded background and slightly raised cut pile design.

Elegance

The carpet for this elegant room is designed as a tapestry effect created in 100% wool dense loop pile with a partial hand sheared surface to give an antiqued finish.

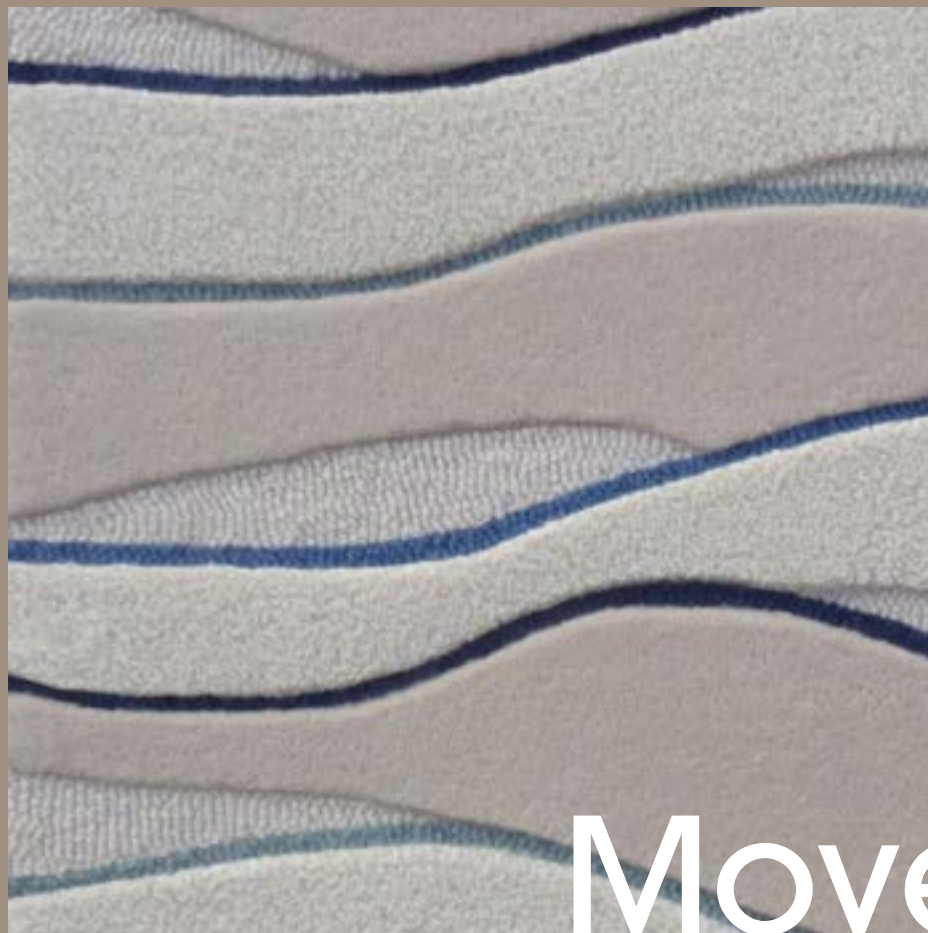

Sometimes simplicity is the best solution. This carpet made for a formal dining space in a prestigious university is produced from a high density 100% wool loop pile with a tip sheared surface finish.

Simplicity

Commercial

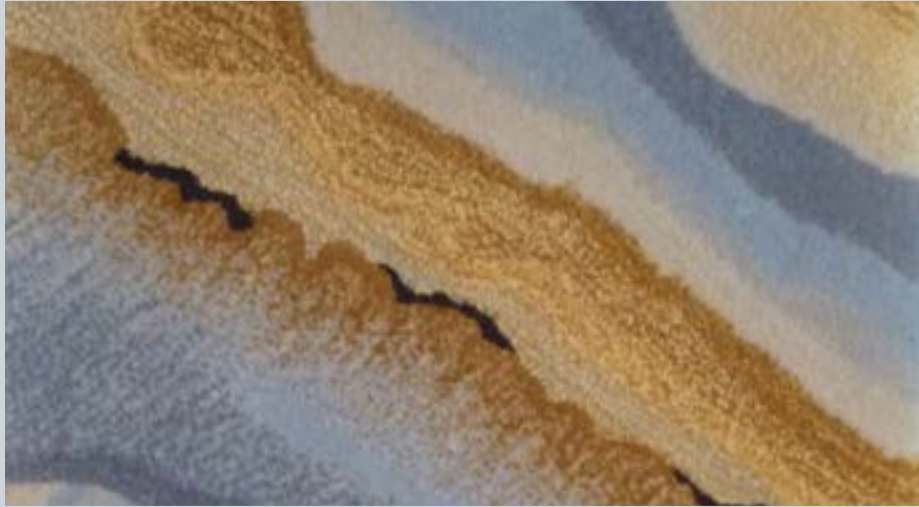

Movement of design, multiple textures, plain and stippled colours combine in creating this stunning superyacht's saloon and dining space.

Made in 100% wool cut and loop pile with hand carved finish.

Movement

This spectacular rug was interpreted from a section of Malachite. This is just one example of how we can work with almost any source material to create amazing individual pieces for rugs or close fitted carpets.

Many yarn and textural options are available for your project.

Spectacular

The possibilities are endless. This 100% wool carpet designed for a superyacht saloon, extending to the hand carved staircase wall carpet, ensuring consistency throughout the interior.

Endless

A Complete Service

Initial Consultation

An appointment can be arranged to meet in our West Sussex showroom or at the project location to discuss all aspects of design, quality, yarn types and colours.

Design & Sampling

Based on the outcome of the consultation we can produce artwork for consideration and then proceed to sampling for quality and finish approval.

Survey & Quotation

We can work from CAD drawings or arrange site surveys to enable a quotation to be prepared. This can include installation, within the UK or overseas if required.

Acceptance & Ordering

Upon receipt of a signed acceptance of quotation, we would submit a deposit invoice to enable the order to be processed and acknowledged.

Project Management

We pride ourselves on providing the same contact personnel from the initial consultation, quotation, order process, delivery and installation to ensure continuity and service throughout the project.

Transport

Our freight forwarders can arrange road, sea and air freight, with groupage and dedicated options worldwide. We can arrange delivery to nominated agents or door-to-door shipments, if preferred.

Installation

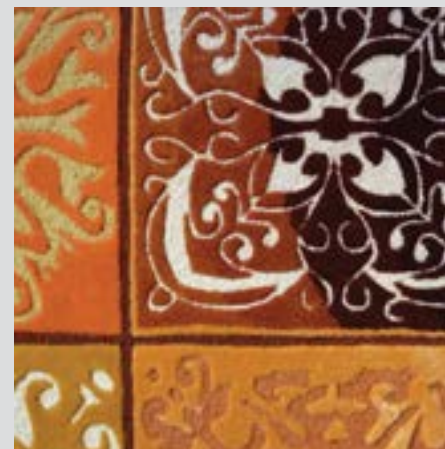

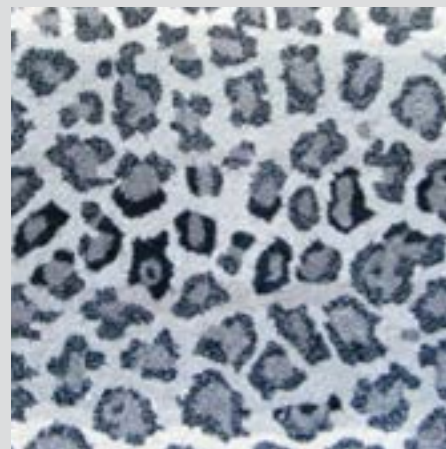

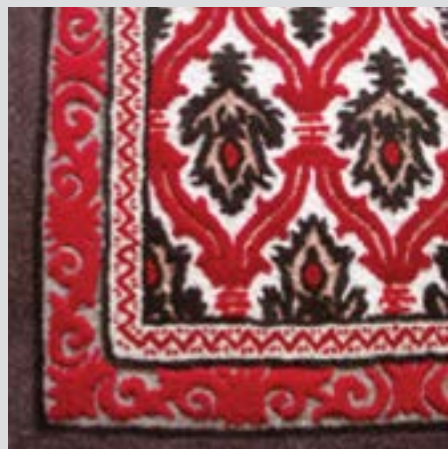

We can arrange fitting with supply of materials throughout the world. Our installers are experienced in all methods, including stretched gripper fixing, adhered systems and our Velcro technique, to allow access on yacht and aircraft installations.

Maintenance & Cleaning

We can offer a maintenance programme for carpets and rugs through our recommended advisor, who travels across the UK and overseas. We can supply cleaning equipment and training for larger properties or superyachts.
